

ProSight-SMB

Single-Server NVR and Camera Management Software Platform for Small and Medium-Scale Installations

Employing the same video management engine as OnSSI's larger-scale NVRs, ProSight-SMB delivers impressive features and tools found only in enterprise systems at a very competitive price. It is the ideal IP video surveillance solution for small and medium businesses that require remote monitoring of up to 25 cameras as well as advanced after-the-fact investigation of incidents. With ProSight-SMB, video from any camera, live or recorded, can be accessed by any user over the local network or the internet, for live monitoring, investigation of events and export of evidence.

The Power of IP Cameras can be securely monitored and recorded from any workstation within the local network or over the Internet, taking advantage of your existing IP infrastructure. ProSight-SMB's IP technology enables extending the reach of the surveillance system with wireless cameras, and allows connecting high-coverage megapixel cameras and integrating with physical security systems.

No Proprietary Hardware ProSight-SMB runs on commercial, off-the-shelf PCs. There's no need to buy proprietary hardware or video capture cards, and unlike DVR solutions, you are able to upgrade the system by installing off-the-shelf PC components. In addition, ProSight-SMB supports practically every IP or analog camera by all leading manufacturers - you're free to choose the cameras that are right for you. You can even individually configure each camera for resolution, frame rate, recording mode (continuous, scheduled or on-event) and storage location, to optimize your computing and storage resources.

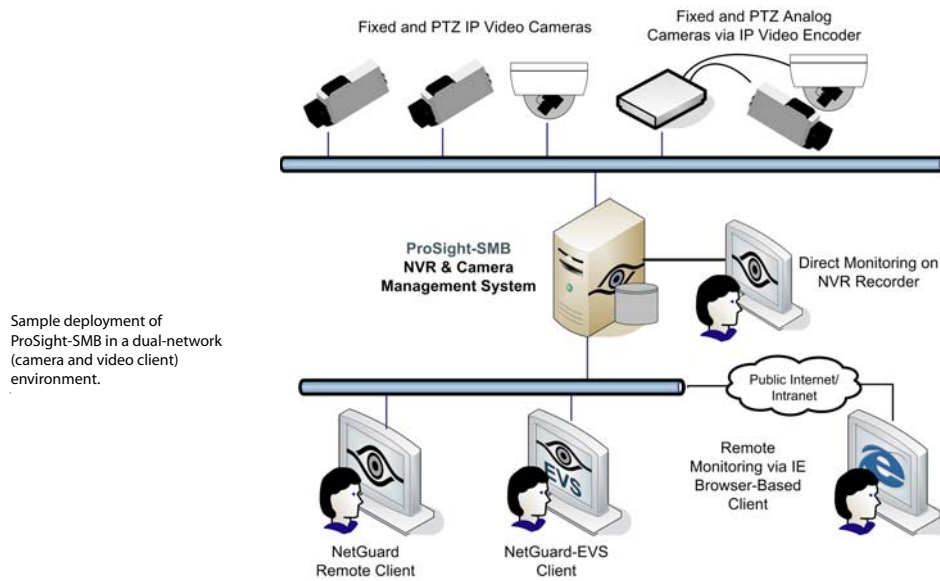

The NetGuard-EVS video client provides advanced live monitoring and after-the-fact investigation tools

Choice of Video Clients Video from any or all cameras can be accessed and controlled via multiple video clients, to suit the demands of any operational situation: the NetGuard-EVS desktop video client, with map-driven access to cameras, multiple screen support and powerful after-the-fact investigation tools including digital PTZ into playback; the NetGuard remote client and the dedicated NVR web client for casual or web-based monitoring with no software download required - ideal for law enforcement access; and the NVR Monitor, running on the NVR server PC, which allows access to all cameras, event investigation and export of evidence.

Intelligent Detection ProSight-SMB's advanced VMD (Video Motion Detection) will alert you by sound and/or email notification when motion is detected on a camera during certain hours. Events generated by motion detection or received from integrated security systems can be easily accessed, previewed and investigated directly within the NetGuard-EVS client, assisted by digital PTZ into playback and synchronous playback of all cameras. Video of the event, together with audio captured by camera-connected microphones, can then be easily exported as an AVI file or in tamper-evident database format, for use as court evidence.

Upgrade Path If you outgrow your system or need to add more advanced features, OnSSI offers you an upgrade path to any of our market-leading software packages – the NetDVR and NetDVMS large-scale Network Video Recorders, as well as NetMatrix, NetSwitcher, NetGuard-EVS, NetPDA and NetCell.

Features and Specifications

- Support for all leading manufacturers' cameras and encoders, including megapixel and 360-degree models
- Simultaneous support for MJPEG, MPEG4, Wavelet and H.263 compression formats
- 100% digital image quality (CIF to over 32CIF)
- Multiple video clients - NetGuard-EVS, NetGuard (1 concurrent user of either), Web Browser Client and local NVR Monitor (not available if installed as Windows Service)
- Simultaneous display of all cameras in system via NetGuard-EVS
- Advanced motion detection setup with 1024 motion exclusion zones per image and audible alerting
- Video recording up to 600,000 frames per day per camera; once-a-day scheduled archiving
- Intuitive map-driven user interface, with unlimited number of configurable camera group views
- Playback investigation tools including digital PTZ into recorded images and graphical event timeline
- 50 presets per PTZ camera; Point & Click and joystick manual PTZ control
- JPEG and AVI export formats
- Single-channel audio recording
- Alarm input (contact closure) integration
- Optional operation as Window Service
- User authentication via Windows User Account and Groups as well as NVR administrator
- Full user activity logging
- Carousel mode monitoring and Hotspot display
- Available in a variety of camera license packages

Ordering Information

ProSight-SMB is available in camera license packages of 4, 6, 9, 16 and 25 cameras:

- ProSight-SMB-4C
- ProSight-SMB-6C
- ProSight-SMB-9C
- ProSight-SMB-16C
- ProSight-SMB-25C

Compatible with Cameras and Video Encoders by:

- Axis
- Bosch
- Canon
- D-Link
- IQinvision
- JVC
- Lindix
- Lumenera
- Mobotix
- Panasonic
- Pelco*
- Pixord
- Samsung
- Sanyo
- Sony
- Toshiba
- Veo
- Vivotek

And many more.

* via video encoder

Please refer to our website, www.onssi.com for an updated list of supported models.

Minimum System Requirements

- Microsoft® Windows XP Professional (32 and 64 bit) or Vista (Ultimate, Business or Enterprise versions)
- CPU: Intel® Pentium® 4 or higher, minimum 2.4 GHz
- RAM: Minimum 1 GB
- Network: Ethernet, 1 Gbit recommended
- Graphics Adapter: AGP or PCI-Express, minimum 1024×768, 16 bit colors
- Hard Disk: E-IDE, PATA, SATA, SCSI, SAS (7200 rpm or faster), 80 GB free (depending on number of cameras)
